Studying can be stressful, there's so much to take in across lots of different subjects and topics. You need to be the master of this but that's easier said than done! There are some simple things that you can try to make studying a little easier:

ORGANIZE

Well-structured and clearly laid-out notes are the key to a successful learning experience. Neat handwriting is important here to ensure clarity even with limited space like on flash cards. Drawing small sketches and diagrams as well as COLORS can help with structure.

COLORIZE

Colors are your secret weapon. You can highlight key words, make important information stand out or draw small sketches. Color coding also is a great method that can help you study more successfully. Visualizing information with colors is an important tool to MEMORIZE information.

MEMORIZE

And now it's time to revise. The process of handwriting and using your own words helps you to memorize information effectively. Small graphics and mnemonics can also improve the recognition of information. With well-structured, handwritten flash cards and your own color system, studying will become so much easier.
